

## Assignment : 01

### Assignment : 01

- ① Define Problem statement and give a brief executive summary snapshot
- ② Executive Summary
- ③ project Descriptive
- ④ project Scope

#### \* Problem :

The issue of medical treatment facing by poor people. As we know poor people face a range of interconnected many problems in their life. I have seen that most of the common people have healthcare issue they have limited access to healthcare service and high costs of medical treatment they do not afford such things. Reliable healthcare offer websites or apps information and educational resources so the person/user get knowledge about symptoms conditions treatments and Also provide the apps and discounts to help the people. Government Hospitals should promote the app as there will be great amount of discount will be awarded.

#### \* Executive summary

- 1) The issue of inadequate access to medical treatment among poor populations is complex. Poor individuals face structural obstacles in accessing healthcare, including financial resource & lack of social mobility.
- 2) poor populations frequently reside in rural or remote areas where healthcare facilities are non-existent.

The lack of nearby medical services leads to delays in treatment and higher rates of untreated conditions.

- 2) poor people often have limited knowledge about healthcare services, preventive measures and the importance of early treatment. This results in underutilization of available services and worsens health outcomes.
- 1) Increase funding for community health center and safety-net programs.

### \* Project Description

1) This project aims to improve access to medical treatment for poor populations by addressing key barriers such as financial constraints, infrastructure, low health literacy. The project will implement a combination of targeted interventions designed to reduce these barriers, improve health outcomes and promote equity in healthcare delivery.

2) Analyze data from national surveys, health insurance claims and community health centers to quantify the scope of the issue.

3) Develop policy briefs and recommendations for healthcare reform.

4) Challenges in implementing the project are financial constraints, geographical and logistical supply chain issues. Ensuring a consistent supply of medical equipment.

### \* project scope

- 1) Conduct a comprehensive review of existing research on healthcare disparities and barriers to care for low-income populations.
- 2) Identify key theme, trends, and gaps in current research.
- 3) Executive summary report, policy briefs and recommendations, framework for monitoring and evaluating progress.
- 4) Total project costs is personnel - 32%. Data and Research - 7%. These cost estimates are rough and may vary depending on the specific requirements.
- 5) Deadline for project, project duration is 6 months.  
literature review and data analysis 2 months.  
stakeholder engagement and data collection 2 months.
